Maternal and child health programmes in Cambodia aim to improve maternal and child health outcomes. The impact of these programmes has been evaluated using various methods, including qualitative research and quantitative data analysis. However, the effectiveness of these programmes in achieving their goals has been questioned, particularly with regards to maternal mortality reduction.

Elsie Initiative (EIF)

The Elsie Initiative (EIF) is a UN Women initiative that aims to promote gender parity in the United Nations system, working to bridge the gender gap in the leadership positions and decision-making in the UN system. The initiative has developed the Uniformed Gender Parity Strategy 2018-2028 to address these challenges.

The Elsie Initiative is led by Shuyu Luo, shuyu.luo@unwomen.org, and Montira Narkvichien, montira.narkvichien@unwomen.org, and Yoomi Jun, yoomi.jun@unwomen.org.
